Work experience

Since july 2019

Full-stack developer - Memento, Paris

Memento is a start-up company specialized in the **photo experience** of the tourism and event industry. I was first hired in internship for **development** (3 months) and **data visualization**, but my missions have been extended in a **work-study** contract to the creation of communication support, prospect contact and customer training.

Since october 2018

Freelance - Paris

D3JS dashboard development and **web application design**. Training of people in professional reorientation to programming. **Data scrapping**.

July - august 2018

Design engineer internship - Infotel, Rennes

June - december 2017

Waiter - La Peña Festayre, Paris

Service and customer contact. Improvement of relational relations.

Training

Since september 2019

Bachelor degree, specialization A.I & big data - ESGI, Paris

Currently in third year. Development of a **deep learning library**, python algorithm and SQL optimizations.

September 2017 -
july 2019

“Grande École” program - HETIC, Montreuil

Preparation for digital issues: technique, design, marketing through numerous concrete group projects. Interest in **data visualization and analysis**.

July 2017 - August 2017

9 Openclassroom certifications

Self-directed learning and achievement of digitally-related certifications.

June 2017

Baccalauréat ES with honours - Emile Zola High school, Rennes

Graduated with a 15.7 average, specialization mathematics.

Skills

Languages
